AWARDS

Dean’s List: IUPUI 2018 – 2022

Graduate of the class of 2022 currently working on expanding my professional background in the webspace. Looking to find an environment that helps me work and grow my skill set. My primary areas of expertise are frontend/backend development, UI / UX design, and illustrations. If ever in need of a full-stack developer, my confidence and skills will meet that requirement.

Work Experience

Project Manager / Estimator – Indianapolis, IN

Grady Brothers | September 2022 - December 2023

Oversaw communications between the firm and project owner and planned/reviewed job setups. Ongoing projects required supervision, organizing, and coordinating to meet expected completion dates and address any ongoing issues.

Skills: Management | Research | Communication | Organization | Effective Listening | Social Skills | Scheduling

Student Mentor – Indianapolis, IN

IUPUI - iDew | August 2019 - June 2022

Assisted high school teachers in the classroom setting to help teach students fundamentals of coding and data analysis, additionally assisted in summer workshops.

Skills: HTML | CSS | JAVASCRIPT | Leadership | Personal Assistance | Education

Shift Leader – Indianapolis, IN

Subway | July 2016 - March 2023

Part-time position maintained throughout high school and college. Held responsible to keep the store in service and operational during the weekday evenings and weekends.

Skills: Time Management | Leadership | Multi-Tasking | Customer Service | Teamwork | Self Motivated | Work in a fast-paced environment

Student Intern – Indianapolis, IN

Defenders | August 2017 - March 2018

High school internship that provided a learning opportunity for critical thinking, effective communication, assisting customers with hardware/software issues, and working in a business environment in the IT field.

Skills: IT Service Management | Computer Troubleshooting | Critical Thinking | Personal Responsibility

Projects

Discover these projects and more on my LinkedIn page*

Keurig Website Rebuild | October 2023 - November 2023

Month-long personal project creating the Keurig site design and functionality. The project is built upon utilizing fundamental coding techniques. Google Firebase web app platform is utilized to create a dynamic webpage that allows users to register an account and purchase coffee machines stored on an online JSON non-sql server.

Tech: HTML | SCSS | JAVASCRIPT | Rest API | Firebase | Nosql | Firebase Webhosting

Kanban Trello Application | May 2024 - Current

Creating a Trello clone application that assists the project management operation and makes it easier for users to keep track of responsibilities and company tasks. This project only covers front end responsibilities.

Tech: HTML | Tailwind CSS | React JS | Redux Toolkit | Wireframing | Figma | Web Design | Github
